CELADON JADE BI DISC

\$680

Hebei, China • Jade • Collection #BJEE051F

W: 11.75" D: 3.5" H: 14.75"

The creamy green color and natural variegation of this jade disk calls to mind a full moon on a dark night. Known as “bi,” these perfectly round discs with a circular hole in the center originally date from Neolithic times. This contemporary example continues the tradition of connecting the heavens to Earth. Some believed these sculptural objects served as conduits to their ancestors, providing familial continuity and respect.
