ROUND HITCHING STONE

\$4,280

c. 1850 • Shanxi, China • Limestone • Collection #BJB051

H: 14.0" Dia: 16.0"

Unlike many objects of its kind, this limestone hitching stone was carved into a simple rounded shape without any figural references. Used to secure a horse by rope or reins, the stone would have been found outside the home of a wealthy homeowner. We love its abstract sculptural shape and raw, strong presence indoors or out.
