"TREE JADE" PETRIFIED WOOD SPECIMEN

\$1,980

Northern China, China • Petrified Wood • Collection #PFW018

W: 15.0" D: 15.0" H: 31.0"

Like scholars' rocks, petrified or fossilized wood is appreciated for its natural beauty. Sometimes called "Tree Jade," petrified wood is thought to bring peace and prosperity to its surroundings. Each specimen has its own unique patterns of fossilized moss, bark, and the rich charismatic kind of scars that come together only after thousands of years. In its raw, unworked state, this particular specimen stands solidly upright, the central cavity making for a perfect planter.
